

NYI NYI AUNG

Web Developer

About Me

I have been learning programming for 2 years by my-self and classes. In those years I did a lot of projects on my own for improving programming skills and debugging skill. I want to be a software engineer in the future. To be a software engineer, I always keep learning new things and doing projects to make things better with the knowledge I already know. I also love coding and it gives me pleasure.

Yangon, Hmawbi

Language

- English
- Japanese
- Burmese (Native)

Expertise

- Creativity
- Critical Thinking
- Teamwork
- Hard Working

Skills

- HTML
- CSS
- TailwindCSS
- Node
- Express
- Vue
- React
- Laravel
- Inertai
- Nuxt

Experience

Hackathon Projects

I participated in a competition organized by the Japanese Government. My team and I did a project for the competition. I faced a lot challenges like hosting and others. Although we did not win the prize, i gained communication skills and programming knowledge from the competition. I learned new things and others.

Own Projects

I'm always learning new things and working on projects to improve upon what I've learned. You can see my projects on my portfolio website. Each project has Youtube video. I'm enjoy to learn new things and it's interesting.

Education

High School

I finished high school in 2019-2020;

Diploma in Network Communication

I attended KMD from the 1st month of 2023 and I finished in September. And I passed the exam.

Skills Summary

Vue	<div><div></div></div> 91%
React	<div><div></div></div> 75%
Laravel	<div><div></div></div> 88%
Tailwindcss	<div><div></div></div> 85%
